Taking professional colour printing to the next level

MFC-L9630CDN & HL-L9430CDN
A4 Colour Laser Printers

www.brother.co.za

Make complex workflows simple

Print management solutions are at the heart of every model. Intelligently automate, securely print and personalise workflows with out-of-the-box solutions.

Our latest colour laser range is designed to deliver the professional performance your business needs - with high-speed, glossy colour printing you can rely on, professional grade security features as standard and the flexibility to tailor your printer to suit you and your business.

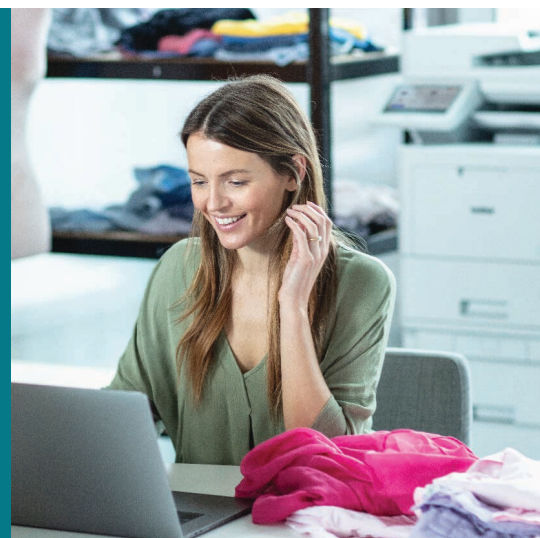

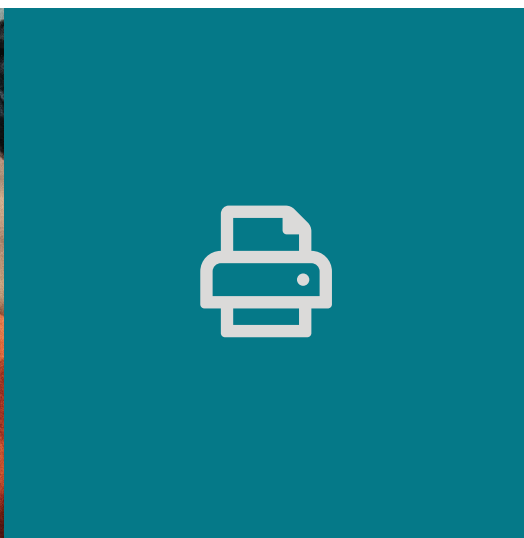

Exceptional quality and simple scalability, all in one colour laser printer range

**PEACE OF MIND.
GUARANTEED.**

When you purchase a Brother printer and our genuine inks or toners, we'll support you every step of the way with our FREE 5-year warranty commitment.

YOU DO NOT NEED TO REGISTER YOUR PRODUCT, our warranty is automatic when you purchase your Brother printer. To keep your Brother machine running in optimal condition we recommend using only Brother Genuine Consumables, this will ensure you automatically enjoy our exclusive 5-year warranty.

Solutions enabled

Print management solutions are at the heart of every model - enabling you to automate workflows and improve efficiency and security. You have the option to upgrade your printer with intelligent Brother and third-party^{12/13} solutions. This gives you complete flexibility in how you manage, secure and control your documents.

Premium colour

Our most advanced colour printing technology is guaranteed to make the right impression when it counts, with vibrant, professional colour prints and accurate digital capture using advanced image processing. The highly efficient fuser unit works seamlessly with the next generation toners. Producing a premium, glossy finish with high colour density to each document, every time.

Brother Solutions Interface (BSI)

Compatible with industry leading Print Management software providers, Brother Solutions Interface (BSI)^{12/13} offers developers the opportunity to create custom print management solutions that fit with niche requirements of end users. Whether you're a third party developer, in-house development team or channel partner, BSI opens up a new world of possibilities for Brother devices.

KOFAX

YSOFT

PaperCut

¹³ Optional third party utilities compatible with the MFC-L9630CDN and the HL-L9430CDN, additional purchase may be necessary

Secure by design

As working conditions change, security is more critical than ever. That's why each single function printer and all-in-one comes equipped with a range of features that deliver enterprise level security.

To safeguard data against loss or theft, Transport Layer Security (TLS), Secure Socket Layer (SSL), IPsec and Scan to SSH Server (SFTP) are supported so that your most confidential files transfer using up to 256-bit encryption during transmission over the network. Using automatic intrusion detection, devices recognise abnormal activity and take preventative measures in order to ensure the printer remains secure.

Plus, identity management and access control help to reduce risk with selective user restriction, only allowing authorised employees or groups to get instant access to specific settings and functions they need.

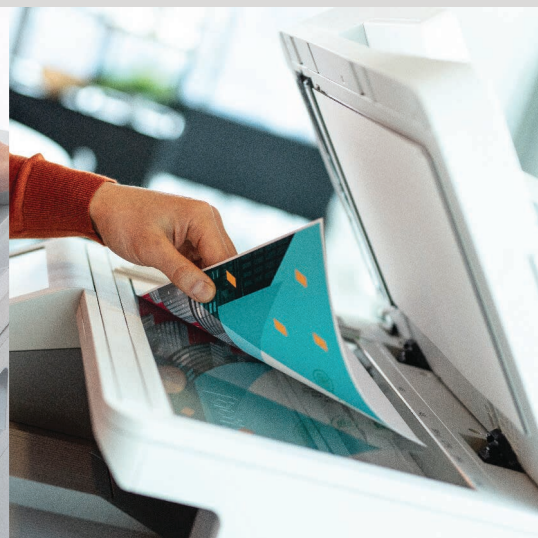

Engineered for Performance

The robust design, upgraded memory and long-life components provides confidence your printer keeps on performing without interruption.

With fastest in class 2-sided scanning speeds of up to 100 ipm, physical documents are easily transformed into digital files with precision clarity.

Twin laser technology enables productivity to be greatly improved. With a first print out time of less than 10 seconds and a duplex print speed of up to 28 pages per minute, you are never kept waiting for that important document.

Model Number	Parts Life
Engine Life	400k pages
Fuser Unit	200k pages
Drum Unit	100k (Auto Reset)
Belt Unit	150k pages
Waste Toner Box	100k pages

Unlock new possibilities with our range of Brother Advanced Solutions*

Workflow Solutions

Custom User Interface Personalised printer touch screen

Make time consuming and complicated document filing and archiving simple with custom UI. Create specific workflows for frequent 'scan-to' destinations on the fully customisable touch screen, enabling your files to be saved to the correct location in one touch.

Barcode Utility Automatically route documents with barcodes

Reduce the labour-intensive task of scanning many documents, saving and then renaming the files. Barcode Utility enables documents that have a barcode to be scanned and saved to the required location, automating the separation of a batch of documents and routing each individual file to the designated folder on your network.

Barcode Print Plus Printing barcode fonts with ease

Brother's Barcode Print Plus enables you to easily print barcodes from your Brother printer. You simply supply your printer with the information for the barcode, the barcode is then printed exactly as it should appear. The quality of the barcodes reflects Brother's exceptional printing standards. So, they are read with ease by a variety of barcode readers.

Security Solutions

Secure Print Plus⁷ Print secure documents from a specific printer

Secure Print Plus enables you to print your confidential business documents securely. Your sensitive documents are only printed when you are ready to collect them from the printer. Only authorised staff can collect their documents and users are easily added or removed.

Advance Secure Print Print your document from any printer connected to your network

Pull printing is a unique way of printing wherever you are in the office. Advance Secure Print enables you to print your document from any printer connected to your network using a PIN or with a tap of an authorised NFC card. Brother Advance Secure Print works with compatible devices activated with this feature.

¹² The above solutions do not come as standard on the device.
A licence key per machine is required to activate Brother Advanced Solutions.
For more information on how to access these solutions please contact Brother International South Africa

Printer Management

Remote Panel

Remote printer support

Remote Panel operates in real-time, offering a complete interactive interface to your printer. Your IT provider can access the full functionality of your printer, to quickly diagnose and resolve any issues and enable settings to be changed as if they were physically standing at the printer.

Request Help

Diagnostic reports for IT administrators

Request Help is a Brother service that enables your IT administrator or service provider to easily troubleshoot errors that may occur. You simply press the 'Request Help' icon on the control panel and a full diagnostic report is created and automatically emailed to your IT administrator.

Order Supplies

Order supplies from your printer

Effortlessly order your toner cartridge supplies directly from your printer, with the Order Supplies service. In one touch, your selected supplier will be notified when you require replacement supplies and arrange delivery, ensuring you never run out of toner when you need it.

¹² The above solutions do not come as standard on the printer.
A licence key per machine is required to activate Brother Advanced Solutions.

Flexibility that saves you time

Businesses are constantly evolving to stay ahead. Our colour laser printer range allows you to easily adapt as your business grows - adding productivity boosting features for optimal performance, such as a mailbox for sorting your printed documents, your printer can be easily transformed to help your business productivity. The paper tray configurations available for all models offers practical functionality for your day-to-day printing needs, saving you time and money without needing to invest in multiple printers.
