Playing our part for Sustainability

Smarter Packaging.
Lighter Environmental Impact.

Brother continues to advance sustainability through engineering innovation. Brother's new printer series features EPS-free, recyclable packaging engineered for reliable protection and logistics efficiency.

Workflow

Built for business efficiency

- Monitor and control your Brother fleet with network-based management tools
- Boost efficiency with high-speed scanning for faster document processing

Productivity

Reliable performance, made to last

- Robust design, built for demanding businesses
- High-yield toners keep you printing without interruptions
- Keep printing for longer with scalable paper capacity
- Streamlined design, up to 25% smaller than previous model

Secure by design

Device Security

Your device protects your business by minimising attack surfaces through:

- Secure user access via LDAPS, Active Directory, and NFC authentication
- Controlled privileges using Secure Function Lock and Setting Lock
- System integrity ensured by intrusion detection, Secure Boot, and digitally signed firmware

Network Security

Your network is protected with flexible, industry-standard tools including:

- Intrusion protection through protocol control, interface restrictions, and IPv4 filtering
- Secure connections via IEEE 802.1X for enterprise wired and wireless networks
- Encrypted communication using TLS, SSH, IPSEC, HTTPS, and SNMPv3
- Centralised management with Device Master Settings, BRAdmin Pro 4, and Mass Deployment Tool
- Syslog reporting for seamless real-time SIEM integration

Document Security

Your documents are protected through:

- Encrypted transfer via IPPS/HTTPS for printing and TLS, HTTPS, SFTP for scanning
- Non-persistent memory, ensuring data is wiped after each job or reboot
- Secure print release, so documents only print when you're ready to collect them
- 3rd party integration via Brother Solutions Interface (BSI), to streamline workflows

Print common file types
from supported Android
mobile devices and Windows
computers

Apple AirPrint

Print common file types from any
AirPrint enabled application

ChromeOS™

Supports Work with
Chromebook printing

Our printers support driverless printing across Windows, macOS, iOS, and Android devices for instant, secure, and hassle-free setup

Printer Functions

Direct Print

Print directly from the front or rear USB host port using a USB flash memory drive. Supported formats include; PDF 2.0, JPEG, TIFF (scanned using Brother model)

Print Complete Notice

A notification can be set to go to your computer when printing

Manual 2-Sided Print^{4,25}

Manual 2-sided printing recommended for media not supported by automatic 2-sided print

Carbon Copy⁴

Prints additional copies of the same document to paper taken from additional paper trays

Header Footer Print^{3,25}

Add the date, time, login user name, or custom text to the top or bottom of each printed page

N-up Printing³

Reduce up to 2, 4, 9, 16 or 25 A4 pages into just one A4 page, Mac (Airprint) up to 2, 4, 6, 9, or 16

Poster Printing^{4,25}

Enlarge 1 A4 page into a poster using 4, 9, 16 or 25 A4 pages

Watermark Printing^{3,25}

Watermark your documents with predefined or user-defined text

Secure Print³

Protect print jobs with a release code required at the device in order for them to be printed

Storage Print

Easily retrieve and print your documents or reprint stored documents all of which are AES 256 encrypted and held within an attached USB flash memory drive storage (not included) via the rear port

Automatic 2-Sided Faxing

Scans and faxes documents using the Automatic Document Feeder (ADF)

Grey Scale

256 shades (8 bit) of grey are available for faxing

Memory Transmission | Out of Paper Reception

Up to 500 pages (ITU-T Test Chart, Standard Resolution, JBIG)

Compression Methods

Ranging from basic to advanced with MH, MR, MMR, JBIG

Fax Functions

PC-Fax Send⁷ and Receive^{4,7}

Send and Receive black & white faxes directly from your PC

Internet Fax (I-Fax)

Fax documents over the internet as an email TIFF attachment

Fax to Server

Scan a document and send it over the network to a separate fax server

Automatic Redial

Automatic redialling if the recipient fax is busy

Telephone Index

An electronic, alphabetical listing of stored speed dials and group numbers

Chain Dialing

Allows the user to store parts for long dialing sequences in different speed dial locations

Dial Restriction

Restrict number dialing to prevent unauthorised or accidental outbound calls

Error Correction Mode

ECM detects line errors during fax transmission and resend the page(s) of the document that had an error (recipient machines must share this feature for it to work)

Batch Transmission

Stores documents for the same location in the machines memory for transmission in a single call

Auto Reduction

When receiving a single page document longer than A4 (297mm) the fax machine will automatically reduce the message to fit onto a single A4 sheet

Fax Stamp

Add the date and time to all received faxes

Cover Page

Create custom cover pages for outgoing faxes

Broadcasting

Send the same fax message up to 350 locations (manual 50 locations)

Fax Forwarding

Sends a fax received in memory to another pre-programmed fax number

Remote Retrieval

Allows users to remotely access their machine and retrieve stored fax messages

Station ID

An ID and fax number will be printed as the header of every fax sent

PBX

Enables seamless fax operation in office environments by supporting PBX phone systems

Connectivity

Mobile Connect

Use a Brother app to Print from and scan to a mobile device running iOS or Android operating system

Brother Print Service Plugin⁵

Print from Android devices without a dedicated App

Microsoft Universal Print

Organisations can manage their brother print infrastructure through cloud services from Microsoft

Brother Apps¹²

Cloud Secure Print, Scan to; mobile, Searchable PDF, Microsoft PowerPoint, Word, Excel, Easy Scan to email, and Fax Forward to Cloud/Email

Web Connect^{12,16}

Without a PC you can download to print and upload from scan and fax for Box, Microsoft SharePoint Online, Dropbox, Evernote, OneDrive, Google Drive™, OneNote

Email Print^{12,16}

Enables driverless printing via email

Fleet Management Tools⁵

BRAdmin⁴

LAN/WAN management software

Auto Pull Configuration

The device periodically checks an encrypted settings file on a network location. If the device has been changed the file is used to change back to the desired state configuration

Embedded Web Server

Using the IP address or node name of your device access via USB or network via a web browser to the web based print management software embedded onto the device using a randomly encrypted password

Mass Deployment Tool

Provides a configuration interface to help manage and deploy device settings.

Software⁵

Brother iPrint&Scan

Print from, scan to, preview copies and check the machine status from Windows or macOS PC using Brother software

Print Support App⁴

As an alternative to Windows Modern Print this method enhances compatibility and ease of use by enabling printing without traditional printer drivers, making it a versatile and efficient solution for modern printing needs accessible through the Microsoft Store

IP Filter

Restrict which network users can or cannot access the device over the network

Security Features

E-mail Notifications

Automatically have the device send e-mail alerts when it requires attention, such as when the toner is low or needs replacing

E-mail Reports

Receive usage reports on a regular basis via e-mail

Secure Boot

All Brother Print devices are secure by design. Devices automatically recognise security attacks and take preventative measures, including rebooting where necessary, in order to ensure the device remains secure

Digitally-signed Firmware

The firmware for Brother Print & Scan devices is digitally signed and secure

Active Directory/LDAP Authentication

Utilise existing infrastructure to restrict access to Brother devices using AD/LDAP. Staff can easily use their existing network login credentials to authenticate

Port-based Network Access Control

(IEEE 802.1x)
Brother devices are in full compliance with this standard, to allow connection to an 802.1x EAP (Extensible Authentication Protocol) protected network

Restrict network protocols

The network access control feature allows an administrator to restrict communication protocols (e.g. FTP, Telnet) as required

Setting Lock

Configure secure access to the devices control panel by locking individual features

Secure Function Lock 3.0

Use a 4 digit pin or a password to identify and authenticate an individual or groups of users over a network. Allows access control with username for up to 200 users

Store Print Log

Allows audit of a print log file saved to CIFS server. Record ID, type, name, user, date, time, page count for every print job

Firmware Updates

In addition to allowing automatic updates to the latest version the printer can be set to not receive older firmware versions to avoid downgrade by an unauthorised user

SysLog

Allows IT Admin to access a single application (SIEM tool) to get device status updates for audit purposes over Syslog

Near-Field Communications

NFC Card Reader

Supports secure user authentication via NFC card reader for access control, and enables personalised workflows through NFC Shortcut configuration. Third-party card reader support requires additional purchase and can be connected to the front or rear USB host and registered via the embedded web server

Address Book

Speed Dials

300 locations for E-mail addresses and fax numbers

Group Dial

A combination of up to 20 groups can be stored

LDAP

The ability to connect to an external LDAP enabled address book, like Microsoft Exchange

Developers

Brother Solutions Interface (BSI)

Create powerful cloud and on premise solutions directly integrating the advanced print, scan and security capabilities of Brother devices.
