

BRAdmin Professional 4

The Fleet Management Tool for Brother Devices

Monitor All Your Printing Devices At Once

BRAdmin Professional 4 (Windows only) is a management tool for network-connected Brother devices and other SNMPcompliant network printing devices.

You are able to view the status and activity of all networked devices, such as error status, remaining supply levels, page count, and more, through an Explorer-style window.

The grouping function lets you organise devices into groups and apply one device's data to multiple devices at once. BRAdmin Professional 4 allows IT Administrators to view devices in a familiar GUI to quickly track and manage their fleet.

Benefits of BRAdmin Professional 4

- Easy management and enhanced visibility by monitoring and controlling of devices with real-time updates
- ✓ Protects fleet with secure access to machine settings and configuration
- \checkmark Reduce time and manpower costs with centralised control on a single platform
- ✓ Zero-cost printer management software
- Configure passwords for individual users and setting page limits or colour printing
- Improves productivity with enhanced automation by easily duplicating and reverting to original settings

Features of BRAdmin Professional 4

Instant task

Create Instant Tasks that takes place with immediate effect on a centralised platform. Tasks include:

- Update of printer firmware
- Reboot device
- Edit device settings
- Activate custom software solutions
- Send files to devices
- Backup settings
- Reset network settings

Device Log

Improve management and control of your fleet with the device usage log of all devices in your office. The downloadable log consists of meter reading and detailed usage of each device.

Notifications of device status and usage can be emailed automatically acccording to your preferred settings.

Device Notification

Send real-time updates of machines errors. Configure email notifications to send only important errors that require the attention of the administrator or stakeholder.

- Notification items: All errors: Toner/Ink low
- Toner/Ink low
 Replace toner/ink
- Replace drum
- Consumable warning(user repairable)
- Consumable error(user repairable)
 Consumable warning(requires service engineer)
- Consumable warning(requires service engineer)
 Consumable error(requires service engineer)
- Cover open
- Paper jams
- Memory errors
- Paper input errors
 Paper output errors

- Installation errors
 Hardware/Mechanical errors
- Miscellaneous errors
- Drum Stop
- Belt unit
- Belt near end Belt replace end
- ✓ Belt replace en
 ✓ Waste box/tank
- Waste toner box/Waste tank alert
- Replace waste toner box/waste tank full
- Replace fuser unit
- Replace laser unit
- Replace PF kit
 Send an e-mail when the problem is resolved

Network Setting

Configure various network and email server settings at your fingertips.

General	SNMP Proxy	General	SNMP Proxy	General	SMTP server address:
