MARK OF A SMART
PROFESSIONAL

The Pro Tape range

A range of tapes to meet the identification needs of electricians, network installers and other professionals.

MARK OF A SMART
PROFESSIONAL

Strong Adhesive Tape

For textured and smooth surfaces

In independent laboratory testing, Brother Strong Adhesive Tape maintained 3 times more strength on textured surfaces, than Brother standard tape. This makes it ideal for long term labelling even in the harshest conditions, especially on textured surfaces.

- Use on smooth and textured surfaces

Self-Laminating Tape

For network cable identification

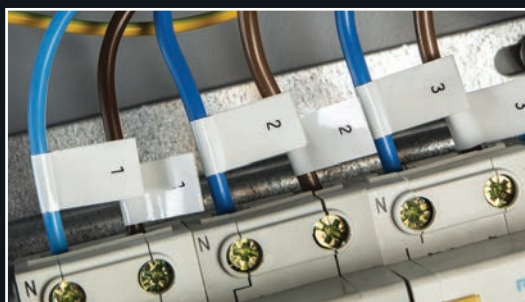

Thanks to a protective overlamine being applied to the whole label at the time of printing, the 24mm tape width can be wrapped around CAT5E and even the thicker CAT6A network cables and still protect the text on the label.

- Use the 24mm width tape cassettes for cables with a diameter of 3.0 to 6.6mm
- Use the 36mm width tape cassettes for cables with a diameter of 3.0 to 10.4mm

Flexible ID Tape

For wire and cable identification

Developed for electricians, network infrastructure, panel builders and other industries that require a reliable wire and cable identification solution, this tape can also be used to mark pipes or other smaller cylindrical shaped items where other tapes may peel over time.

- Use for wrapping or flagging around wires and cables with a diameter of 3mm or more

Fluorescent Tape

For high visibility labels

Perfect for creating labels that grab attention, Brother fluorescent orange or yellow tape is ideal for displaying important information, creating warning signs or categorising specialist equipment. Using the fluorescent tapes ensures that important items can be quickly identified in any emergency situation.

- Use for warning signs, safety instructions and to identify important equipment

Security Tape

For tamper evident labelling

When printed and applied, the label appears the same as a standard black on white label. However if the label is removed, a checkerboard pattern is left that ensures that the label cannot be reapplied once peeled and shows the label has been tampered with.

- Use for asset marking to ensure that the label cannot be re-applied to another asset
- Use on the edge of panels or covers to show if this has been opened by unauthorised persons

Heat Shrink Tube

For wire and cable identification

This non-adhesive tape is made of a special material that is wound in the tape cassette as a flat tube. Once printed on, the tube is opened up and passed over a cable or terminating connector. On heating with a heat gun, the tube shrinks to about half its original width, and in doing so grips the cable.

HSe
TUBE

	5,8mm	8,8mm	11,7mm	17,7mm	23,6mm
Cable Diameter	1.7-3.2mm	2.6-5.1mm	3.6-7.0mm	5.4-10.6mm	7.3-14.3mm
Black on White	HSe-211	HSe-221	HSe-231	HSe-241	HSe-251

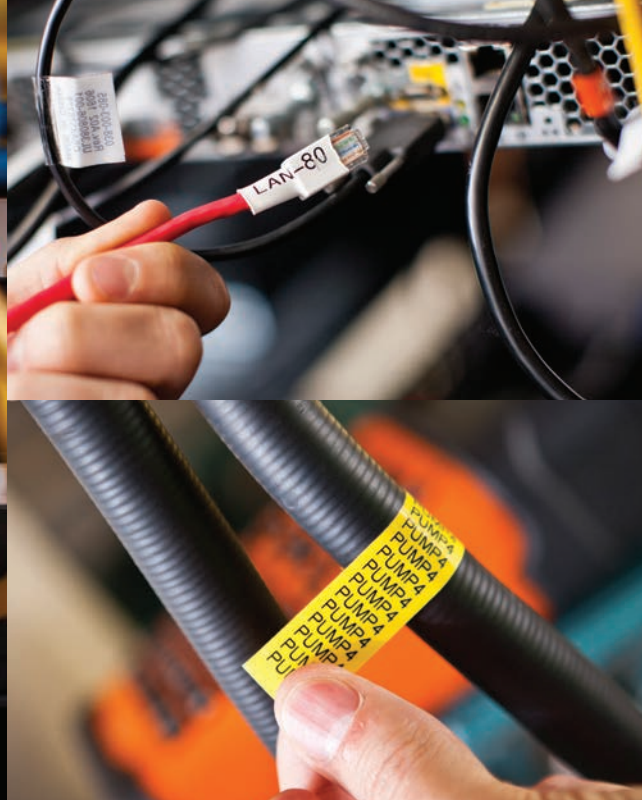

Stencil Tape

For electrochemical etching/markings

Brother stencil tape is used as part of an electro-chemical etching process to produce a mask containing the information to be etched. When an electrical current is passed through a pad containing specialist etching fluid, and pressed onto the stencil tape, it leaves a permanent mark with the text or barcode on the metal.

- Requires electrochemical etching equipment (not available from Brother)

Full Pro-Tape range:

	6mm	9mm	12mm	18mm	24mm	36mm
TZe STRONG ADHESIVE LAMINATED - 8 M						
Black on white		TZe-S221	TZe-S231	TZe-S241	TZe-S251	TZe-S261
Black on yellow			TZe-S631	TZe-S641	TZe-S651	TZe-S661
TZe FLEXIBLE ID LAMINATED - 8 M						
Black on white		TZe-FX221	TZe-FX231		TZe-FX251	
Black on yellow		TZe-FX621	TZe-FX631
